PROFESSIONAL SUMMARY

Computer Science and Engineering student at BRAC University with hands-on experience in cybersecurity, vulnerability assessment, web application security, network analysis, and security-focused software development. Skilled in Python, Linux, Burp Suite, Wireshark, Nmap, and OWASP security practices through CTF competitions, security labs, and practical projects. Experienced in security automation, security research, and Blue Team threat analysis, with a focus on security analysis, threat investigation, vulnerability assessment, and secure software development. Seeking a Cybersecurity Internship to apply technical skills and contribute to real-world security operations.

EDUCATION

BRAC University - Bachelor of Science in Computer Science and Engineering | Jun 2023 - Present | Expected Graduation: 2027

TECHNICAL SKILLS

Cybersecurity: Vulnerability Assessment, Web Application Security, Security Research, Threat Analysis, Security Automation, OWASP Top 10, IOC Analysis, Blue Team Fundamentals, CTF
Security Areas: Network Security, Email Security, Threat Investigation, Digital Forensics, Reverse Engineering, Cryptography, OSINT, Reconnaissance, Enumeration, Privilege Escalation
Security Tools: Burp Suite, OWASP ZAP, Nmap, Wireshark, Katana, Binwalk, ExifTool, LFISuite
Programming: Python, Bash, PowerShell, SQL, Java, C
Operating Systems: Linux, Kali Linux, Ubuntu, Windows, macOS | **Web:** HTML, CSS, JavaScript, React, Node.js | **Tools:** Git, GitHub, Raspberry Pi

PROJECTS

Phishing Email Detection & IOC Extraction Tool | Python, Email Security, SOC Automation
- Developed a Python-based security tool to analyze phishing emails and automatically extract Indicators of Compromise (IOCs).
- Automated extraction of malicious URLs, IP addresses, domains, and email metadata to support threat investigations and Blue Team workflows.

Custom Security OSINT Utilities | Python, OSINT
GitHub: github.com/Debopriyo-Karmaker/Custom-Security-OSINT-Utilities
- Developed automated reconnaissance and OSINT utilities for security research.
- Built a TCP port scanner using Python sockets and automated IP geolocation, ISP, and timezone enumeration through REST APIs.

MediCore - Smart Medical Management Platform | Full-Stack Development
GitHub: github.com/Debopriyo-Karmaker/Medicore
- Developed a healthcare management platform with database-driven workflows, user management, authentication, and secure information handling.
- Applied software engineering, database management, and system design principles to build a scalable application.

Mini Process Manager | C, POSIX Threads, Linux
GitHub: github.com/Debopriyo-Karmaker/mini-process-manager
- Built a Linux-based process manager simulator implementing process creation, waiting, monitoring, zombie states, and synchronization concepts.
- Strengthened understanding of operating systems, concurrency, process scheduling, and low-level programming.

DIGIX - Freelance Digital Agency Project | HTML, CSS, JavaScript
GitHub: github.com/Debopriyo-Karmaker/DIGIX
- Developed a production-ready website for a digital transformation agency.
- Implemented responsive design, custom JavaScript functionality, performance optimization, and interactive user experiences.

Click-and-Build | Full-Stack Web Application
GitHub: github.com/Debopriyo-Karmaker/Click-and-build-
- Developed a PC-building platform with component management and database integration.
- Implemented component browsing and configuration features using full-stack development principles.

CYBERSECURITY EXPERIENCE

TryHackMe - Completed 50+ cybersecurity labs covering web security, networking, privilege escalation, enumeration, exploitation, and defensive security; developed practical skills in Linux, reconnaissance, vulnerability analysis, and security investigations.

PicoCTF - Solved challenges involving cryptography, reverse engineering, digital forensics, binary exploitation, and web security; strengthened analytical and structured problem-solving skills.

Cyber Security Educator - Ethical Hacking Bootcamp, BRAC University - Guided junior students on cybersecurity concepts, security tools, and practical security testing methodologies.

ACHIEVEMENTS

- Ranked **224th out of 1359 teams** in **0xfunCTF International CTF**.
- Ranked **96th** as an individual participant in **Cyber Invasion 2025 National CTF**.
- Published cybersecurity write-ups, challenge solutions, and technical documentation.

CTF Write-ups: github.com/Debopriyo-Karmaker/CTF-Room-Writeups
